JOB ANNOUNCEMENT

Title: Research Technician I

Job Number: 010097-001

Job Type: Laboratory/Research

Posted on: Draft

Employment Category: Full Time
(40 hours/week)

Location:

Harvard College, Arts & Sciences
Cambridge, Massachusetts

Reports to:

Adam Ezra Cohen, PhD
Investigator
[Research Abstract](#) »

Job Summary:

Individual will assist a multi-disciplinary research group, which uses advanced fluorescence microscopy techniques to study voltage dynamics in neurons, bacteria, and other live cells, as well as structural dynamics and function of single biomolecules.

Principal Responsibilities:

- Virus production and maintenance of primary and stable tissue culture cell lines, including occasional primary rodent tissue harvest, under the guidance of postdocs and/or graduate students
- Basic maintenance work in the wet lab, including cleaning glassware, autoclaving, purchasing general laboratory supplies and reagents, etc.
- Attendance/participation in laboratory meetings
- If the individual is interested and time allows, may perform specific scientific projects
- Other duties as required
- May be required to lift, move and transport related research equipment, work with a variety of hazardous materials, and may be required to work with and handle animals

Preferred Qualifications:

- College background in Biochemistry, Chemistry, Neuroscience, Molecular and Cell Biology, or related discipline required
- Bachelor's degree preferred
- Two or more years of experience in related laboratory research
- Must be able to work independently and as part of a team, be self-motivated, and be comfortable interacting with researchers from diverse backgrounds
- Excellent communication skills
- Familiarity with common wet-lab and optical instrumentation and Microsoft Office preferred

Additional Information:

Please include a cover letter and three references with your resume and include the job title in the subject line of your email.
