FALL 2016 SENIOR COMMUNICATIONS PACKET

This document contains important information to help you prepare for your Senior year in HEB. **Please read it carefully!** If you have questions, please email Brenda or Carole as soon as possible! For instance, if your remaining HEB requirements are different from what you expected, there may simply be a mistake or miscommunication, usually easily remedied! Just let Brenda or Carole know.

(See the list of qualifying courses for distribution requirements, JRS, and HEB electives here):

Thesis honors:

Plan on registering for HEB 99a, to set aside time for your thesis work. HEB 99a and HEB 99b are being run this year by Dr. Nick Holowka, who will soon be in touch about what to expect. He will be setting up regular, group meetings with all the thesis writers for you to get the guidance, support (and snacks!) you need as you progress through various thesis stages. Stay tuned, and be sure to let me or Brenda know how things are going!

Meet with Brenda or Carole well before Study Card Day! Please see the Contact Us section of the Life Sciences website for our open office hours during shopping week (re-check them before you stop by to see if they have changed). As a Senior, **it's crucial that you ensure you've met all your concentration requirements**. By coming in for a meeting before Study Card Day, we can have a more in-depth meeting, and then we can have a shorter meeting when you come in to get your study card approved.

Also be sure to check out the HEB Guides and Forms on the HEB section of the Life Sciences website.

We look forward to seeing you soon!

Best wishes,

Carole & Brenda
