2017-2018 Honors-qualifying ("upper-level") Classes in HEB

The following courses count as "upper-level" HEB classes for students pursuing non-thesis honors (NTH) in HEB*. The list includes all Junior Research Seminars (in **bold**) and select other HEB courses.

FALL 2017

- Any **HEB 91r**
- **1285 Why are we different? Human Biological Diversity** (Durgavich)
- 1323 The Science and History of Alcohol (Tuross, Reynard)
- **1410 Gut Microbiome and Human Health** (Carmody)
- **1418 Research Methods in Endocrinology** (Lipson)
- 1426 Becoming Human: New Techniques to Investigate an Ancient Story (Carter)
- **1480 Building the Human Body** (Capellini, Roach)
- 1600 Evolutionary Genetics of Complex Human Traits (Ruvolo)

SPRING 2018

- Any **HEB 91r**
- **1210 Research in Comparative Biomechanics** (Zink, Holowka)
- 1361 Hormones and Life History (Ellison, Lipson)
- **1362 Hunter Gatherers** (Venkataraman)
- **1412 Human Energetics Seminar** (Reynard)
- **1417 Diet and Exercise** (Carmondy, Lieberman, Baggish)
- **1451 Primate Functional Genetics and Genomics** (Capellini)

* On occasion, NTH credit may be given for a course offered in another department. It must be an upper-level course with relevance to HEB, and must be approved by a concentration advisor.
