# Neurobiology Tutorial Sign-Up Fall 2014

This year, we will once again make use of the online electronic sectioning tool to assign and lottery the Neurobiology tutorials.

*** * To sign up for a neurobiology tutorial, you must enter your preferences online using the electronic sectioning tool. * ***

Not sure which tutorial is right for you?

- We are offering 8 tutorials this year, and each will meet once during shopping period. You can and should shop multiple tutorials.
- The tutorial fair on September 2nd (4:30 – 6PM in the Bauer Labs lobby) is not mandatory, but it may give you some idea of which tutorials you would like to shop.

**You have until 11 PM on Monday, September 8th to enter your tutorial preferences online.**

To enter your preferences, go to https://www.section.fas.harvard.edu/ and select the course "Neurobiology 101".

Enter multiple choices in order of your preference. Many tutorials will be full regardless of attendance during shopping week. Please enter ***at least 2-3 selections*** so that we can give you an alternate tutorial if you are not assigned you to your first choice. After entering your preferences, you may log in again and edit them up until 11 PM on September 8th.

**Regardless of any conversation you have had with the Neurobiology advisors or with the tutorial instructor, you must *also* enter your preferences online by 11 PM on Monday, September 8th.**

You will be informed of your tutorial assignment via email by 11 AM on study card day. You may then obtain Dr. Magnotti's or Dr. Draft's signature on your study card.

Questions? Please contact Dr. Laura Magnotti at magnotti@fas.harvard.edu.
